Individual horse bloodlines are available through the Society's Online Stud Book – www.ashs.com.au

Updated: 01/06/2011

Registered Australian Stock Horses used internationally in a breeding program must be **EXPORT APPROVED** to enable progeny to be eligible for ASH Registration. Semen must be collected under the appropriate conditions for export (quarantine). Please view the Australian Quarantine and Inspection Service website in relation to horse semen - <http://www.aqis.gov.au/animex/asp/search.asp>

A list of Export Approved horses is available through the Society's Online Stud Book by using the "Select if" field and "Animal is Export Approved".

THE BREED FOR EVERY NEED
